Freeze Keyword

> 👆 **Important:**
> If the Freeze keyword is entered in the command line by pressing the `Freeze` key, the keyword will be directly executed.

To execute the keyword Freeze directly press `Freeze` .

Another way is to type **Freeze** or the shortcut **Fre** directly into the command line.

Description

> 👆 **Important:**
> If Freeze is on, programmer values have a higher priority as playbacks.
> Only executor priority "Super" has a higher priority than Freeze.

Freeze is function keyword to change the priority of the programmer.

Freeze is a toggle function. This means that entering Freeze without any helping keyword toggles the Freeze-mode on/off.

Syntax

Freeze

Freeze On

Freeze Off

Example

🟡 [Channel]> Freeze On

Turns the freeze mode on.
