dot2 User Manual – Release Notes Version 1.9 – 2024-04-28 English

## Release Notes 1.9

Improved Features

• <u>Macros</u>

Other Enhancements

Fixed Bugs

### **Improved Features**

Macros

+ New in this release

Implemented macro editor.

Predefined macros show a lock symbol.

Macro editor and CMD edit in cues works now with hardware buttons.

### Other Enhancements

+ Added message box after screen calibration that suggests a system restart.

+ Updated fixture library.

# **Fixed Bugs**

#### Description

Fixed screen encoder for fixed layout fixture view.

Current cue in the cue view should be displayed in the upper third of the screen.

Performing a sequence pool clean-up for old show files was explicitly deleting unreferenced sequences.

Portuguese did not work. This bug is fixed. Portuguese is available again.
