Release Notes 1.9

Main Feature Overview

[Improved Features](#)

- [Macros](#)

[Other Enhancements](#)

[Fixed Bugs](#)

Improved Features

Macros

➕ **New in this release**

Implemented macro editor.

Predefined macros show a lock symbol.

Macro editor and CMD edit in cues works now with hardware buttons.

Other Enhancements

➕ Added message box after screen calibration that suggests a system restart.

➕ Updated fixture library.

Fixed Bugs

Description
Fixed screen encoder for fixed layout fixture view.
Current cue in the cue view should be displayed in the upper third of the screen.
Performing a sequence pool clean-up for old show files was explicitly deleting unreferenced sequences.
Portuguese did not work. This bug is fixed. Portuguese is available again.
